Knowledge Corner: Torrefied Wood Doors

Through the torrefaction process, wood becomes highly resistant to extreme weather conditions and water. The wood can withstand hot and cold temperatures, wind, rain, snow, sleet, and other forms of precipitation. This makes it a perfect choice for an exterior wood door.

Plus, torrefied wood doors don't need an overhang!

Get Masonite® DuraStyle™ Torrefied Wood Exterior Doors in Fir, Mahogany, and Maple in many different styles.
