

Masonite® Performance Door System

Get an Edge Above the Rest

You expect a door to do at least two things. Keep what you want to stay in your home, in your home. And keep what you want out, out. But not all doors do that. So, we developed the Masonite® Performance Door System.

When tested, it performs 64% better at keeping air and water out than the leading competitor.

Masonite® Performance Door System

4-Point Performance Seal

1 MASONITE® FIBERGLASS SQUARE EDGE DOOR

Fits perfectly into the frame. Other manufacturers use proud edges, which creates gaps.

AND

2 ENHANCED CORNER PADS

Designed to stop upward water pressure driven by wind and form a tight seal between the door and frame.

3 ADAPTIVE WEATHERSTRIPPING

Made to snap back into shape when bent or twisted, this high-end, low-wick memory foam weather stripping stops air and water in its tracks.

AND

4 SELF-ADJUSTING SILL

Automatically adjusts for seasonal changes and foundation settling. Provides advanced protection from leaks, drafts, sand, dust, and debris.

* OUTSWING MASONITE® PERFORMANCE DOOR SYSTEM OPTIONS ALSO AVAILABLE

Masonite® Fiberglass Square Edge Door

Square edges are standard on all our fiberglass doors and fit perfectly into the frame for a solid, energy efficient seal.

Endura® PE650 Weatherstripping

This weatherstripping forms a tight seal between the door panel, frame and sill.

Endura® Simple Solution® Corner Pads

These corner pads are designed to stop upward water pressure driven by wind.

Endura® Z-Articulating Cap Sill™

This sill automatically adjusts when conditions change over time, without the need for manual adjustments.
